EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Nelson Quintero on June 24, 2005.

The application has been amended as follows:

claims 7-12 and 21 have been canceled;

claim 1, last line, --, wherein the patterned area is thinned relative to an area of the second pixel electrode layer that is not patterned-- has been inserted before "signal lines".

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: nonelected claims without traverse 11-26 have been canceled.

REASONS FOR ALLOWANCE

2. Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record does not anticipate nor render obvious to one ordinary skilled in the art a liquid crystal display device having variable viewing angles comprising a combination of various elements as claimed, more specifically, a second liquid crystal cell on the first liquid crystal cell, the second liquid crystal cell having third and fourth substrates spaced apart from and facing each other, a first alignment layer on an inner surface of the third substrate, a second alignment layer on an inner surface of the fourth substrate, and a second liquid crystal layer interposed between the first and second alignment layers, wherein the first and second alignment layers are arranged to have holographic patterns, and a switching part for selectively applying electric field to the second liquid crystal layer.

Hashimoto ('210) discloses a liquid crystal display device comprising a plurality of liquid crystal cells and alignment layers. Jansson ('754) discloses a liquid crystal display device

comprising a holographic diffuser. However, neither discloses a liquid crystal display device having variable viewing angles comprising a combination of various elements as claimed, more specifically, a second liquid crystal cell on the first liquid crystal cell, the second liquid crystal cell having third and fourth substrates spaced apart from and facing each other, a first alignment layer on an inner surface of the third substrate, a second alignment layer on an inner surface of the fourth substrate, and a second liquid crystal layer interposed between the first and second alignment layers, wherein the first and second alignment layers are arranged to have holographic patterns, and a switching part for selectively applying electric field to the second liquid crystal layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
